a comprehensive and illuminating account of event and festival management written with academic rigour yet highly accessible quinn is an astute judge of what students want and need to study in this field

first published in 1985 the event model presented in this study attempts a framework for integrating psychoanalytic and piagetian psychologies centered in the notion that development occurs by the differentiation of self and nonself its aim is to understand phenomena conceptualized in psychoanalytic terms in a model based on this piagetian perspective or in other words to provide an object relational model for the development of psychic structure analytic and piagetian psychologies centered in the notion that development occurs by the differentiation of self and nonself

the sociological theory of practices developed in this book from the concept of the event compels us to question how practices not only chain into forms of practice the approach also allows us to see how these practices give rise to practice formations that manifest as enduring zones of intensity within society this very problem is at the center of the considerations pursued here and is unfolded through an analysis of pop music as a formation of practice as an exemplary case study the author chooses the love and peace festival on fehmarn from the year 1970 in doing so the book brings to life a period of pop music that has much more to do with our present than it may seem at first glance
