one of the fundamental laws of the universe seems to be the law of vibration it says that almost everything moves and nothing remains constant humans basically exist in a system of motion when brain cells get activated they set up a vibration in the body therefore to move the hand one needs to trigger brain cells to move the body or the hand would not move brain body coordination is always essential vibration is indeed a mechanical process that causes oscillations around a point of equilibrium the term originates from the latin word vibrationem to shake or quiver the oscillations can be

regular such as a pendulum's motion or casual such as rolling of tires on a gravel road to illustrate further the motion of a tuning spoon the reed in a music instrument like piano a mobile device or the funnel of a loudspeaker are suitable for vibration almost everything seems to vibrate through an external force

entertaining and quotable the official rules and explanations delivers thousands of laws principles rules proverbs and aphorisms collected by Paul Dickson and the official fellows of the Murphy Center for the Codification of Human and Organizational Law

everything in life both on this planet and in the entire universe follows the divine laws whether we agree or disagree whether we are aware or unaware we can live without being aware of them and this fact is not considered a serious mistake but then we have to accept that things surrounding us happen in a chaotic manner and that we do not understand why sometimes we get luck and other times when we most need it we only get bad luck we must also accept the fact that projects in which we've invested years of our lives may never get to see the light that we won't be able to make choices like what we eat or what we wear or who we spend the rest of our life with in other words that our life flows in an unpredictable way whereas in a normal situation we are programmed by nature to be happy healthy harmonious and to have a wealthy living
